

INAPPROPRIATE AND FRAUDULENT USE OF RT-PCR TEST IN REPORTING “COVID CASES”!

The information presented below provides clear evidence that the PCR test is **not capable** of determining whether any individual is sick or is carrying a **live** infectious virus of any kind.

United Kingdom Government Document!

The screenshot on the right was taken from page 6 of the **Public Health England** document entitled:

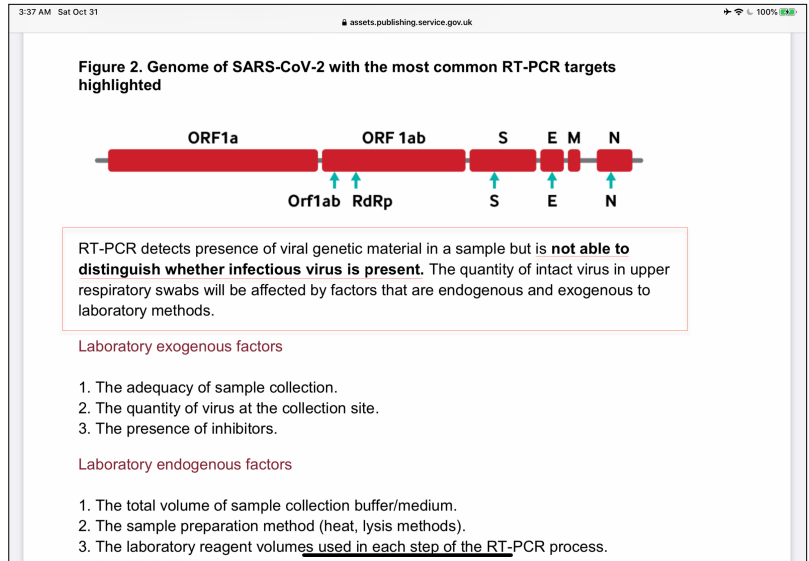

“Understanding cycle threshold (Ct) in SARS-Cov-2 RT-PCR”

The highlighted statement in the screenshot reads:

*“RT-PCR detects presence of viral genetic material in a sample but is **NOT able to distinguish whether infectious virus is present.**”*

This document can be downloaded at:

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/926410/Understanding_Cycle_Threshold_Ct_in_SARS-CoV-2_RT-PCR_.pdf

Screenshot taken from page 6 of the UK Government document “Understanding cycle threshold (Ct) in SARS-Cov-2 RT-PCR”

United States Government Document!

The screenshot shown on the right was taken from the first page of a document entitled:

“Quick SARS-CoV-2 rRT-PCR Kit”

The highlighted statement reads:

*“Positive result are **‘INDICATIVE’** of the presence of SARS-CoV2 RNA. Clinical correlation with patient history and other diagnostic information is **NECESSARY** to determine patient infection status.”*

The document further states:

*“The agent detected **MAY NOT** be the definite cause of disease”!*

This PCR Test Document can be viewed and downloaded from the US government website at:

<https://www.fda.gov/media/137780/download>

Introduction

This Emergency Use Authorization (EUA) package insert must be read carefully prior to use. EUA package insert instructions must be followed accordingly. Reliability of EUA assay results cannot be guaranteed if there are any deviations from the instructions in this package insert.

Intended Use

Quick SARS-CoV-2 rRT-PCR Kit is a real-time RT-PCR test intended for the qualitative detection of nucleic acids from SARS-CoV-2 in upper respiratory specimens (such as nasal, nasopharyngeal, mid-turbinate or oropharyngeal swabs), and lower respiratory specimens (such as sputum, tracheal aspirates, and bronchoalveolar lavage) from patients suspected of COVID-19 by their healthcare provider. Testing is limited to laboratories certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), 42 U.S.C. §263a, to perform high complexity tests.

Results are for the identification of SARS-CoV-2 RNA. The SARS-CoV-2 RNA is generally detectable in upper and lower respiratory specimens during the acute phase of infection. Positive results are indicative of the presence of SARS-CoV-2 RNA. Clinical correlation with patient history and other diagnostic information is necessary to determine patient infection status. Positive results do not rule out bacterial infection or co-infection with other viruses. The agent detected may not be the definite cause of disease. Laboratories within the United States and its territories are required to report all positive results to the appropriate public health authorities.

Negative results do not preclude SARS-CoV-2 infection and should not be used as the sole basis for patient management decisions. Negative results must be combined with clinical observations, patient history, and epidemiological information.

Screenshot taken from the 1st page of the US Government document “Quick SARS-CoV-2 rRT-PCR Kit”

Summary

The PCR test simply detects a fragment of RNA which could be present in a person's body for any number of reasons, such as a dead left over fragment from a previous infection such as that from a common cold or flu (both of which are often a form of coronavirus).

It is clear from government provided documentation that the RT-PCR test is not capable of definitively and reliably determining whether any person is sick or carrying a live infectious virus. Yet it is being used as a sole diagnostics tool upon which pretty much the entire world has been fraudulently locked down.

Further evidence is provided on the following page from the Nobel Prize winner inventor of the PCR test himself Dr (PhD) Kary Mullis.

NOBEL PRIZE WINNER AND PCR INVENTOR KARY MULLIS COMMENTS ON THE PCR TEST

Nobel Prize winner and inventor of the PCR Test Kary Mullis speaking about PCR test states:

“It doesn’t tell you if you’re sick and it doesn’t tell you that the thing you ended up with really was going to hurt you or anything like that”

<https://filealchemy.com/karrymullis>

← Click link above or this image to view video **be sure to watch the end of this clip!!!**

Conveniently, and sadly, Kary Mullis lost his life in August 2019, just 2 months before the **Event 201 Corona Virus Pandemic Exercise**. See below.

EVENT 201 - GLOBAL PANDEMIC EXERCISE - NEW YORK (OCTOBER 2019)

The exercise took place just around 1 month before the first case of Coronavirus was reported in Wuhan, China.

Highlights Reel

The highlight Showreel can be seen on Youtube at: <https://youtu.be/AoLw-Q8X174>

The full **Event 201** website can be accessed at: <https://centerforhealthsecurity.org/event201/>

So, conveniently, Kary Mullis is now not around to inform the world of the invalidity of the PCR test as it is being used to fraudulently report so called “cases” of Coronavirus!

Fortunately, we do have the above recording of Kary making that very important statement!

UK 'OFFICE FOR NATIONAL STATISTICS' COVID-19 INFECTIONS DATA

The U.K. government and mainstream media have reported that **72,128** people have died "with" COVID-19 during 2020. Notice that they state "with" and not "off" or "from", although some news agencies have been stating "from" which continues to further re-enforce the misinformation being bombarded onto the public!

However, according to the official U.K. government statutory **Notifications of Infectious Diseases (NOIDS)** data by **Public Health England (PHE)** published on the below government website, **only 13,871 people were INFECTED with the virus during the whole of 2020!**

The weekly COVID-19 infections published on the below UK government website during 2020 are as follows:

Week 1 = 0	Week 14 = 210	Week 27 = 189	Week 40 = 729
Week 2 = 0	Week 15 = 460	Week 28 = 259	Week 41 = 1090
Week 3 = 0	Week 16 = 736	Week 29 = 161	Week 42 = 500
Week 4 = 0	Week 17 = 753	Week 30 = 115	Week 43 = 105
Week 5 = 0	Week 18 = 664	Week 31 = 98	Week 44 = 91
Week 6 = 0	Week 19 = 977	Week 32 = 74	Week 45 = 117
Week 7 = 0	Week 20 = 1301	Week 33 = 100	Week 46 = 87
Week 8 = 0	Week 21 = 1080	Week 34 = 129	Week 47 = 109
Week 9 = 0	Week 22 = 421	Week 35 = 164	Week 48 = 230
Week 10 = 0	Week 23 = 381	Week 36 = 126	Week 49 = 76
Week 11 = 1	Week 24 = 326	Week 37 = 412	Week 50 = 181
Week 12 = 85	Week 25 = 164	Week 38 = 227	Week 51 = 50
Week 13 = 116	Week 26 = 169	Week 39 = 523	Week 52 = 85
			Total Infections: 13,871

The above listed weekly numbers can be verified by opening each of the 52 weekly reports found on the below government website and turning to page 14 of each report. <https://www.gov.uk/government/publications/notifiable-diseases-weekly-reports-for-2020/>

The total figure of **13,871** is **NOT** the number of deaths, but the number of **infections**, therefore, how is it possible for the number of COVID-19 deaths during 2020 to have been **72,128** as reported by the government and the media???

COVID-19 **NOT** CLASSIFIED AS A HIGH CONSEQUENCE INFECTIOUS DISEASE!!!

And classified as having a low overall mortality rate!

Status of COVID-19

As of 19 March 2020, COVID-19 is no longer considered to be a high consequence infectious disease (HCID) in the UK. There are many diseases which can cause serious illness which are not classified as HCIDs.

The 4 nations public health HCID group made an interim recommendation in January 2020 to classify COVID-19 as an HCID. This was based on consideration of the UK HCID criteria about the virus and the disease with information available during the early stages of the outbreak. Now that more is known about COVID-19, the public health bodies in the UK have reviewed the most up to date information about COVID-19 against the UK HCID criteria. They have determined that several features have now changed; in particular, more information is available about **mortality rates (low overall)**, and there is now greater clinical awareness and a specific and sensitive laboratory test, the availability of which continues to increase.

Here it can be seen that as of **19th March 2020**, **COVID-19 was not considered by the UK Government to be a high consequence infectious disease (HCID)!!!**

COVID-19 was also classified as having an overall low mortality rate...

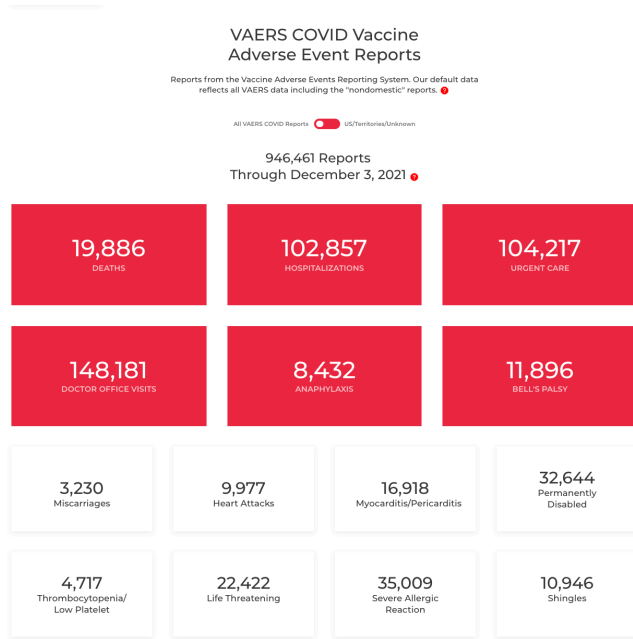

Does this sound similar to the annual flu?

Yet, just 4 days later, UK Prime Minister Boris Johnson put the country into lockdown!!!

This notification can be found at: <https://www.gov.uk/guidance/high-consequence-infectious-diseases-hcid>

RESOURCE WHERE SOME OF THE UNITED STATES REPORTED COVID VACCINE DEATHS AND INJURIES CAN BE FOUND. THE BELOW SHOWS REPORTED INJURIES AS OF 3rd DECEMBER 2021

Note: These figures may not be up to date. Please click the image on the left or the links below for the latest figures.

At the time of updating this document the number of deaths reported following the CV-19 injection up to 29th October 2021 was **19,886**.

VAERS is a voluntary reporting system and it is widely reported to represent **less than 1%** of the actual vaccine injuries that are occurring!

This means the number of **deaths** published as at 3rd December 2021 could potentially be as high as around **1,988,600!**

← **Click image to see latest figures!**

The latest US reported death toll following the injection (including accompanying reports) can be seen at: <https://filealchemy.com/cv-vaers> ←

The latest updates of the above VAERS data can be found at: <https://www.openvaers.com/covid-data> ←

Remember, it is widely reported that these figures represent less than 1% of actual injuries!

UNITED KINGDOM YELLOW CARD 'VACCINE INJURY' REPORTING SYSTEM

COVID-19 Vaccine Analysis Overview

Report run date: 02/12/2021

Data lock date: 01/12/2021

Manufacturer	Total reports	Total reactions	Total fatalities
AstraZeneca	238,641	846,118	1,138
Moderna	20,520	67,504	18
Pfizer	139,263	397,047	634
Unspecified	1,307	3,970	32
Totals	399,731	1,314,639	1,822

The UK also has a little known 'voluntary' vaccine injury reporting system called the Yellow Card System. It appears however that the Yellow Card Reporting System has deliberately been made quite difficult to navigate through to acquire the required data.

The 'UK Column', an independent news reporting website, has provided a page which summarises the data (see screenshot below) extracted from the Yellow Card System. The latest figures can be see at the below link:

<https://filealchemy.com/yellowcard>

NOTE: The below table is a screenshot and may not be up to date. Please click the image below or the link above to obtain the latest compiled results.

COVID-19 “VACCINE DAMAGE BILL” BEING DISCUSSED IN PARLIAMENT

COMPILATION OF COVID-19 VACCINE INJURIES REPORTED ON A FACEBOOK GROUP BEFORE THE GROUP WAS CENSORED AND TAKEN DOWN

Here you will find a compilation of screenshots of reports describing Covid-19 vaccine injuries (including deaths) reported either by the injured party or family members where a death had occurred.

The number of reported injuries were increasing at a rapid rate which appeared to have prompted Facebook to remove the group.

The number of members grew rapidly to 127,000 before the group was removed! More Big Tech censorship?

You decide!

YOUNG NURSE COLLAPSES DURING LIVE TV INTERVIEW JUST 17 MINUTES AFTER COVID-19 INJECTION

Young staff nurse collapses during a live television interview, just 17 minutes after receiving the COVID-19 injection!

It later emerged that the nurse died (although so called fact cheers have tried to deny this was so). There has been no post on her social media channels since the incident.

She leaves a husband and two young children.

Click the below link (or the image on the left) to view the clip.

Parents talks about the death of their 32 year old son who dies within 12 hours of receiving the COVID-19 injection.

“My 32 year old step son Benjamin was killed by the Johnson and Johnson vaccine on March 14th 2021. Within 12 hours he was dead of a cardiac arrest, sudden death”.

There has been a great many similar reports of victims dying within hours of receiving the injection. These deaths are being heavily censored and NOT being reported by the general mainstream media.
